Successful Research Grant Planning: Assembling Winning Proposals
A Workshop
September 25th, 2014
Successful Research Grant Planning

Assembling Winning Proposals

Overview: Successful Research Grant Planning

This resource has been created to assist you in identifying and obtaining available research grant funding. As reflected in the tabs at the top of this page, the information provided with this guide has been divided into 3 categories, as follows:

- **Identify Grant Opportunities**
  - The Reference Section of the Evans Library contains several comprehensive and annually updated print resources for those seeking grant funding associated with particular areas of study/research, regions of the country, recipient status, etc.
  - The U.S. Government has a variety of online resources related to available grant funding and procedures for applying. Online resources are also available for identifying grant funding opportunities from the private sector. While many of these resources are databases requiring a subscription, others are free to access.
Identifying grant opportunities

**Did You Know?**

Did you know that after you receive the email notification from SAM that their registration process is complete, it can take 24-48 hours for Grants.gov to electronically receive the registration information from SAM? The registration process must be complete in Grants.gov before AORs can apply for a grant. To quickly and easily verify if the AOR registration process is complete in Grants.gov, [click here](#).

DOE Office of Science Award Search Website

The award search returns lists of (1) grants, (2) cooperative agreements, and (3) interagency awards currently funded by the DOE Office of Science. An award will appear in the search within the office or division that manages it:

Select Organization
- All Organizations

Advanced Search »

SEARCH

The dollar amount returned by the search represents the planned award amount over the award period at the time the award was initiated. The total actual award amount may be more or less, depending on the outcome of progress reviews, supplemental proposal considerations, and available funding.

Award lists can be exported into spreadsheets for sorting and analysis. To do this, search under the organization heading of interest. On the search results page, an "Export to Excel" link can be found.

New awards recommended for funding by program managers will not appear in the search until after they are awarded by the contracting officer.
